

THE LODGE
AT LITTLE DUCK

THE LODGE AT LITTLE DUCK HENIK LAKE ADVENTURES

*Offering Incredible Fishing and Hunting Adventures in
Northern Manitoba and Central Nunavut*

Current #1 SCI World Record Muskox

WELCOME TO THE LODGE AT LITTLE DUCK & HENIK LAKE ADVENTURES

Northern Manitoba & Nunavut's Premiere 5 Star Fly-in Fishing and Hunting Destination

The Lodge at Little Duck is nestled in the heart of Northern Manitoba's Sub Arctic Wilderness, roughly 675 miles north of Winnipeg MB. This is truly a fascinating land that has changed very little over time.

Over 250 miles separates us from the closest road or intrusion making the wilderness experience at The Lodge at Little Duck all that more adventurous.

No other lodge this far north welcomes its guests to the convenience and comforts of a full service Northern 5 Star Lodge complete with chef prepared meals, individual cabin accommodation with private ensuite, daily cabin service, thermostatically controlled heat, 24 hour a day power and a fully modern cedar appointed Main Lodge.

If staying in touch with the outside world is a must during your stay, Wi-Fi is available in both the main lodge and cabins. We even offer complimentary long distance calls using our VOIP phone.

Our chartered executive twin turbo prop aircraft with pilot and first officer brings you safely to our 3500' private airstrip that is equipped with a "state of the art" GPS Approach, a system similar to what is used at most

major airports. This enables our pilots to take off and land safely even in periods of inclement weather. As a matter of fact, The Lodge at Little Duck is the only lodge in Manitoba that has embraced this flight safety technology.

This is the land of the midnight summer sun, and in the fall our guests are thrilled to experience the colorful and ever changing displays of the northern lights. Nothing compares to the allure of the Aurora Borealis: natural, mysterious and unforgettable! You'll be thankful to have your camera along.

This magnificent part of Northern Manitoba is also home to the Qamanirjuaq Caribou Herd that is still estimated at well over 275,000 animals. These Central Barren Ground Caribou have used both our front and backyard for their annual fall migration for centuries.

In 2015 we expanded our Caribou hunts into Nunavut in partnership with Henik Lake Adventures and are now offering Trophy Caribou Hunts at our Edehon Lake and Baralzon Lake Caribou Camps. We still remain the only outfitter in this vast area of Nunavut to offer these high percentage caribou hunts.

In 2017, we started offering spring and fall muskox hunts from the community of Baker

Lake, another 400 miles north of our main lodge location. We access the spring muskox herds on snowmachine, returning the warmth and comfort of the Nunamiut Lodge in Baker Lake at night for a hot meal and shower.

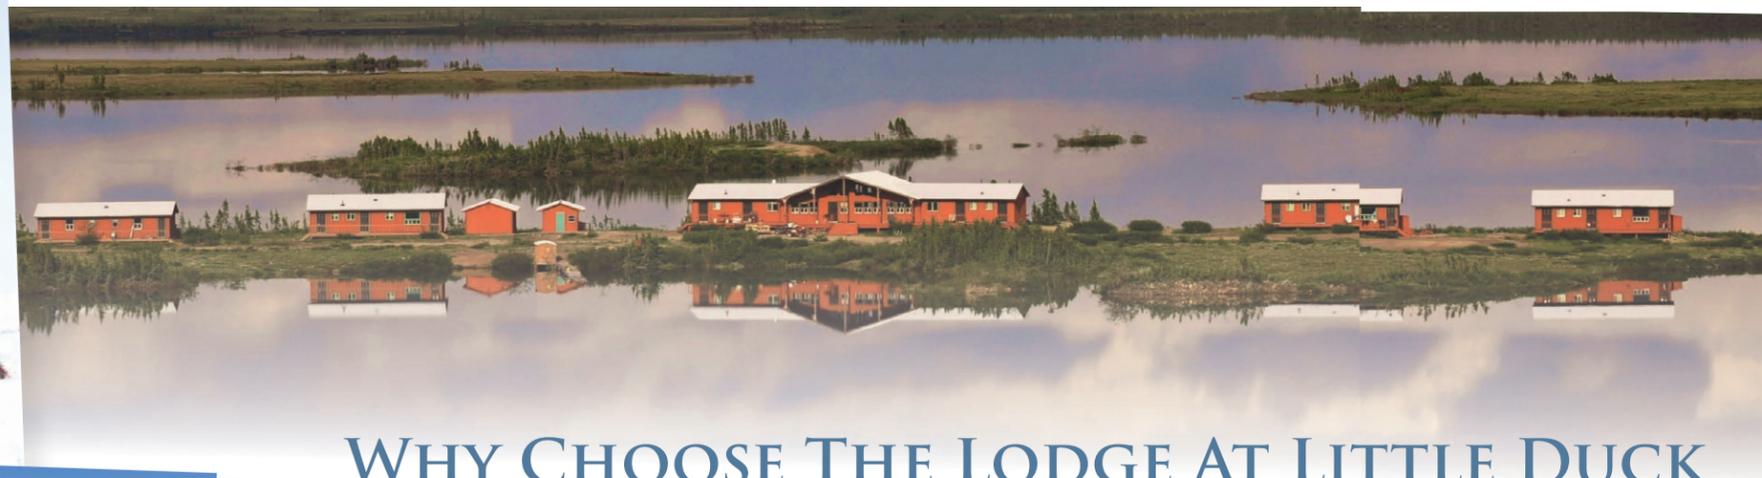

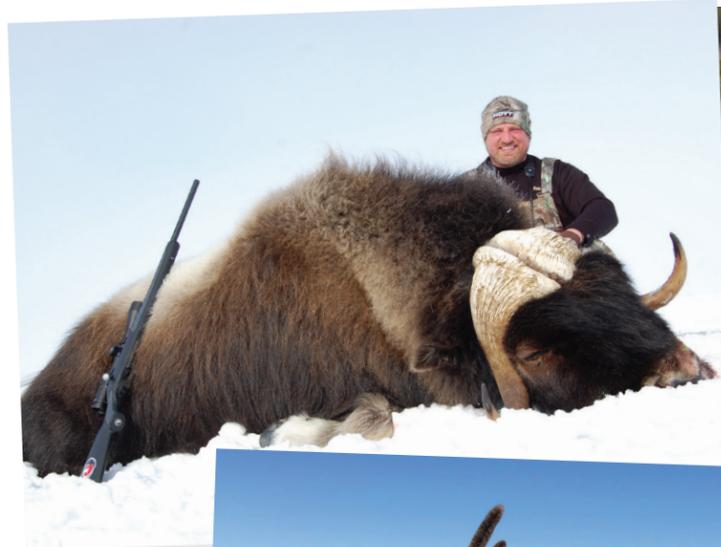

During the fall hunts a caribou can be added to the package, making this a very sought after combo hunt. We have maintained a 100% success rate since inception on muskox with over 75% of animals making B&C.

In 2017, one of our guests harvested a monster muskox bull of a lifetime that is currently the new #1 SCI World Record.

With your safety in mind, our experienced, dedicated and highly motivated team will provide you with the friendly and personalized service that will make you want to return for more adventures year after year.

Plain and Simple; The Lodge at Little Duck offers incredible fishing and hunting adventures, along with spectacular scenery, exceptional lodging, meals and service.

Please join us this season at The Lodge at Little Duck/Henik Lake Adventures for a "world class" wilderness adventure that will inspire memories for years to come.

WHY CHOOSE THE LODGE AT LITTLE DUCK & HENIK LAKE ADVENTURES?

Listen To What Some Of Our Guests Are Telling Us

Thanks for putting together such a great caribou camp. Everything was beyond my expectations. The staff was friendly, skilled and were truly concerned about our safety and success. Above all that everyone in camp harvested a great caribou. Meals were out of this world.
—Glen A. Wisconsin

Thanks for hosting my father, brother and myself on our first Arctic Caribou hunting adventure. Coming all the way from New Zealand to hunt with you was such a great experience. The staff, camp amenities, incredible meals, arctic landscape and the quality of animals were all fantastic. All 3 of us took fantastic bulls and 2 out of the 3 should make B&C.
—Cameron, William and Gary R. Timaru New Zealand

Awesome, awesome, awesome!! Fishing was outstanding, the accommodations and staff were excellent. After being here the year before, I could really see all the improvements you

have made. Grade A I look forward to making it back in the future to "rip some more lips"
—Jonathon T. Dickerson Maryland

I truly had a great Muskox/Caribou combo hunt. Your guides were top notch and they had tremendous knowledge of the country. These were the 21st and 22nd animals on my way to the North American 29. Thanks again.
— Greg P. Visalia CA

As seasoned veterans of fishing and hunting adventures across the globe, we always look forward to returning to The Lodge at Little Duck. It has everything Jessica and I look for including incredible trophy fishing, (on the fly) experienced guides, great equipment, service, food and overall hospitality. It is always comforting for me to know I can invite family, friends, colleagues or more importantly customers on these trips and regardless of fishing skill or knowledge; everyone's needs will be looked after equally. We all have such great fun

at Little Duck, and are already looking forward to trip #8.
—Jeff and Jessica K. Washington DC

None of our group had ever done anything like this before so we didn't know what to expect but everything was as advertised. The guides were very experienced, friendly, accommodating and really knew the country and the animals.

We got to see wolves, wolverine, seals, swans, caribou, ptarmigan, black bear, and of course the polar bear. The camp managers were great hosts and went out of their way to make sure we were well taken care of. The sit down meals and shorelunches were great. We all got to take home what we feel are excellent caribou that will look awesome hanging on our walls for years to come as the hunting stories are retold to friends and family. Thanks for the unforgettable experience.
— Galynn, Gerald, Noah, Rance Burwell NE

FISHING

Experience the Incredible Trophy Fishing at The Lodge at Little Duck

Last Season Our Guests Averaged Five Manitoba Master Angler Fish Per Person

Fish for Trophy Northern Pike, Lake Trout and Arctic Grayling at our Northern 5 Star Wilderness Fishing Lodge. The waters of Little Duck and Neganilini Lakes along with the Wolverine River system are virtually untouched and provide unlimited opportunities to catch all three species of trophy fish. Since we are the only lodge on the lake, our guests have over 300,000 acres of private waters to fish and explore without the possibility of seeing any other boats other than ours.

Hundreds of miles of shoreline with numerous shallow weedy bays, deep summer holes, mid lake reefs, streams and rapids provide ideal structure on any given day for trophy sized Northern Pike, Lake Trout and Arctic Grayling. A Manitoba record 22" Grayling was caught on a fly within sight of The Lodge and guests have battled monster Northern Pike up to 53". Lake Trout in the 40" - 48" range are not uncommon. With this quality fishery, there's no need for "daily fly-outs" at The Lodge at Little Duck!!

Because of our northerly location, the ice on our lakes is not typically out until the last week of June. This time of year provides incredible sight fishing opportunities for Northern Pike,

and it's very common to catch these monsters in 1 - 3 feet of crystal clear water. These fish are post spawn, and are basking in the warmer water that these back bays provide. Lake Trout are also still very shallow (4-12 ft.) and Arctic Grayling are congregated in the moving water of the rivers and streams preparing for the spawning period in the weeks to come.

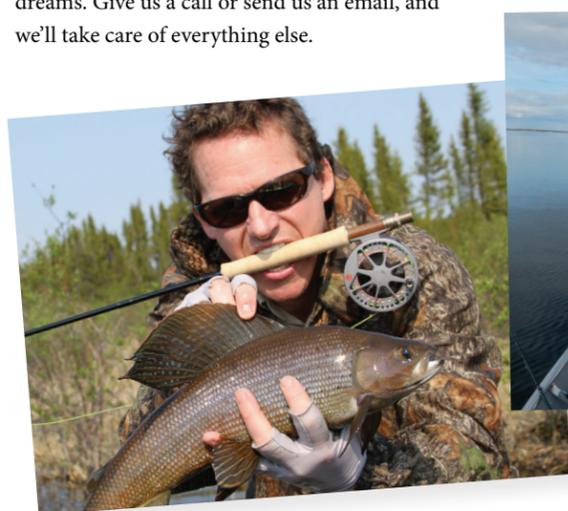

We offer 5 and 7 day all inclusive packages with departures directly from Winnipeg. Unlike other lodges, we get you into camp the night before your package starts, so you're fishing on the first day of your package, not traveling. All our boats are custom Alumarine Pro Guide models complete with 40 hp Yamaha 4 stroke motors. Each boat is equipped with depth finder/GPS units, radio communication between boats and main lodge, boat safety equipment, life jackets and topped off with experienced, helpful and friendly guides. Complimentary Shimano rods, reels and basic tackle is also available for those that choose not to bring their own equipment.

Over the past 4 decades, The Lodge at Little Duck has been extremely consistent in their "catch and release" policy. Only a few smaller fish will be allowed to be harvested daily for either lunch or dinner purposes. The winner of this policy has always been our guests who reap

the benefits with the high number of Trophy Fish that are caught on a daily basis.

Whether your passion is fly fishing with large streamers for pike and lake trout or using tiny nymphs for grayling, or using spin cast gear with spoons or spinners, the waters surrounding The Lodge at Little Duck definitely has an angling adventure for everyone. For more information on our fishing packages, please visit our website at www.thelodgeatlittleduck.com.

There is little that can compare to the feeling you will experience in this beautiful untouched wilderness, while catching the fish of your dreams. Give us a call or send us an email, and we'll take care of everything else.

FALL FISHING AT ITS BEST LATE AUGUST - SEPTEMBER

Lake Trout, Northern Pike and Arctic Grayling

Ever wondered what it's like to fish for monster lake trout and actually catch them in 3-5 ft. of water? The answer is quite simple. It's absolutely amazing! The last week of August and the first couple weeks of September will see these huge female lake trout move to shallow rocky reefs and points in anticipation of their yearly spawn.

These magnificent fish are displaying their full fall spawning colors that can only be seen at this special time of year. And if you think they are sluggish during this period, you are sadly mistaken. They will absolutely crush any bait that comes by their view.

Whether you are casting a 5-7" streamer or trolling an assortment of monster large spoons on mid lake reefs or rock piles, the results are the same...huge lake trout. We have yet to find a spoon that is too big for these monsters, and a 3-1/4 oz. Husky Devle 5 of diamonds is as good a spoon as any.

We use single barbless hooks for easy releases, and practice CPR (catch, photograph, and release) to make sure this incredible fishery remains strong and sustainable for not only us, but for future generations as well. The average size of the trout varies, but you can be rest assured there is an abundance of trout in the 35-40" class and many that are in excess of 45". During a period of 1+ day, a lucky group of hunters that were all tagged out on their caribou hunt had over 50 Manitoba Master Angler Lake Trout (the minimum Master Angler lake trout is 35").

On top of the fantastic fall lake trout fishing, The Lodge at Little Duck still has some of the best pike fishing to be found anywhere in Canada. These predators are constantly stalking these shallow waters looking for their next meal and to beef up as much as possible in anticipation of the hard water season, which as you can imagine, lasts quite a while in the north. Arctic Grayling are also available in big

numbers this time of year, and can be fished in the relatively calm waters of the Wolverine River, which just happens to be located right behind The Lodge at Little Duck.

The grayling are also looking to beef up before winter arrives and can be caught using different techniques with spin cast or a fly. It is not unusual to have a 16 inch grayling on the end of your line only to have a huge lake trout come up and completely swallow the grayling. After that, and with 6 lb test line, the fight is on.

Our Fall fishing starts the last week of August and goes through the month of September. Come and experience firsthand the beautiful fall colors of our northern landscape during the day, while experiencing the magical colors of the "northern lights" at night.

We're sure you will enjoy the hospitality of Manitoba's premiere 5 Star fly-in fishing and hunting lodge and experience first hand some of the best fall fishing to be found anywhere in North America.

Whether your game is fly-fishing, trolling, jigging or casting, there are plenty of ways to take advantage of the incredible fall fishery we have at The Lodge at Little Duck.

HUNTING

Central Barren Ground Caribou

Come and join us for a incredible hunting adventure in the pristine sub-arctic wilderness areas of Northern Manitoba and South-Central Nunavut. Here you'll find superb opportunities to hunt for Trophy Central Barren Ground Caribou. Although our hunting locations are in some of the most remote areas of North America, we make getting here quite easy.

We are licensed outfitters in both Manitoba and Nunavut and we can help you plan a trophy caribou hunting trip of a lifetime. We offer our guests the option of choosing between the 5 Star amenities of our full service main hunting lodge in Manitoba, or our extremely comfortable and hunter friendly remote camps located further north above the 60th parallel in Nunavut.

Regardless of where you choose, personal service is still the name of the game, and you'll find this at whatever camp you decide to hunt from. All our camp staff and our guides will go above and beyond to ensure your trip is safe and successful.

We are entering into our 5th year of successful partnership with Ryan and Dorothy St John of Henik Lake Adventures. HLA is the outfitter of record for all our hunts based in Nunavut.

We have over 500 square miles of prime Caribou hunting habitat at our disposal in both Manitoba and Nunavut. Hiking from the water's edge to the higher ground of the many ridges enables hunters to "glass" vast amounts of tundra in search of that trophy caribou.

Whether you prefer to hunt with rifle, bow or black powder, we can put together a world class hunt for you. The rolling landscape is not hard to navigate and combined with the use of boats allows us to tailor a hunt to an individual's preference or physical ability.

Although our area is mainly tundra, it still offers excellent patches of cover in terms of small stands of spruce, dwarf birch along with outcroppings of rock and natural ridges that ads for a great "spot and stock" hunt for that monster Caribou of a lifetime.

Our hunting season starts at the end of August, and goes through to the 4th week of September. All our non-resident hunts are "all-inclusive" and are fully guided 2 X 1 by licensed Manitoba or Nunavut guides who are true outdoor professionals and also have many years of guiding/hunting experience. For more information on our caribou hunting packages, please go to our websites at www.thelodgeatlittleduck.com and also www.heniklakeadventures.com

MUSK OX

Baker Lake Nunavut

Our Musk Ox hunts are based out of the community of Baker Lake. In springtime, herds of Musk Ox can be found within short snow machine rides of town (usually between 30-45 minutes). Late summer and early fall will find the animals near the lake and along the rivers as they herd up for the annual Musk Ox rut.

The animals of this area are of the Barren Ground sub species of Musk Ox. These animals are typically larger than their island cousins by about 10-15% in body and horn size. On average, well over 80% of the animals taken by our hunters will meet or exceed the Boone & Crockett minimum score. This area is virtually un-hunted for Muskox.

Our licensed hunting guides are also community hunters, meaning the skill and knowledge they have of the the land and animals is second to none. They will do what it takes to ensure you have a safe and successful hunt. Even with our close proximity to the community, these animals are not generally targeted by local hunters. This has led our hunters to enjoy a 100% success rate on previous Musk Ox hunts. By hunting in this area, we are able to take advantage of the comfortable accommodations not traditionally experienced by Musk Ox hunters.

During the spring hunts we use a lodge in Baker Lake to provide private rooms with end of day hot showers and excellent meals for our hunters. During this time of year, the Muskox "coat" is at it's absolute best. Full, thick and very clean. They have survived another Canadian Arctic winter with its extreme cold and bitter winds.

Our fall Musk Ox hunts will be based out of comfortable tent camps, a short bush flight out of the community of Baker Lake. Once in camp, we will access the different Musk Ox area's by boat, ATV or by hiking. Animals at this time of year will be concentrated near water, either Baker Lake itself, or one of the large rivers feeding or draining into the lake. These hunts are guided one on one (unless specified otherwise) and hunter and guide will travel to traditional Musk Ox areas and glass for groups of Musk Ox.

This time of year, the rut is on and most groups will have a dominant bull that will be larger than other members of the herd. Once the animal is located and it is determined stalk-worthy, the hunter and guide will move in. With bulls competing for breeding rites, and the available foliage and terrain, this hunt will be conducive for fair chase bow hunting opportunities.

GETTING TO THE LODGE AT LITTLE DUCK

THE LODGE
AT LITTLE DUCK

We Offer Two Departure Points For Our Summer Fishing Adventures: Winnipeg or Thompson, Manitoba.

For All Fall Hunting & Fishing Packages, Departure Is From Thompson, Manitoba.

Driving

Thompson is a very easy 8 hour drive straight north of Winnipeg MB on Provincial Highway #6. This is a very good, all-season paved highway. There are many services and towns along the route for your convenience. Your vehicle can be safely left at our Air Charter Co. that has staff on-site 24/7.

Commercial Air

Most major airlines connect into Winnipeg's James Armstrong Richardson International Airport. Direct flights to Winnipeg are available daily from Chicago, Minneapolis and Denver including all other major Canadian cities. Once in Winnipeg, we suggest Calm Air which normally has 3-5 scheduled flights to Thompson and back to Winnipeg daily. Overnighing in Thompson is required prior to the start of your fall fishing or caribou hunting package.
